27367	7590	07/01/2005	EXAMINER	
WESTMAN CHAMPLIN & KELLY, P.A. SUITE 1400 - INTERNATIONAL CENTRE 900 SECOND AVENUE SOUTH MINNEAPOLIS, MN 55402-3319				ST CYR, DANIEL
ART UNIT		PAPER NUMBER		
		2876		

DATE MAILED: 07/01/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	10/643,562	KLINEFELTER ET AL.
	Examiner	Art Unit
	Daniel St.Cyr	2876

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 19 August 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-53 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-53 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 19 August 2003 is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
 Paper No(s)/Mail Date 5/13/04 , 5/02/05
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. _____.
 5) Notice of Informal Patent Application (PTO-152)
 6) Other: _____.

DETAILED ACTION

Claim Objections

1. Claims 3, 6, 12, 14, 17, 20, 28, 39, are objected to because of the following informalities:

These claims use “it” to refer to an element, said “it” should be replaced by the element it represents. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 5-10, 14-25, 28-30, 38-41, 43, 45, and 47-49 are rejected under 35 U.S.C. 102(e) as being anticipated by Provost, US Patent No. 6,335,799.

Provost discloses a plastic card personalizer system comprising: a processor 102 for processing cards 108; a printer 106 for printing information on the card; the card has magnetic strip 140 for storing card identification (a magnetic reader/writer inherently presents), writing surface 112, alphanumeric character 124, security text 128, logos 120, a tamper proof text “void” on the writing surface 112 having a plurality of lines over it; comparing means for verifying the information printed on the card. Provost is capable of performing the functions and the method steps set forth in these claims (see figs. 1-2, 6; col. 12, line 8+).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this

subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3, 5, 6, 8, 9, 14-20, 31, 32, 35-37, 43, 44, and 50-53 are rejected under 35 U.S.C. 102(e) as being anticipated by Slocum et al, US Patent No. 6,430,306.

Slocum et al disclose a systems and methods for identifying images comprising: a recording unit 14 for recording on data cards 90; a vision inspection cell 12 for inspection of the data card 90; an imaging station fixture 30 optically coupled to one or more camera stations, the camera element to image the data recorded onto the data card 90; a decoding unit 58 decodes the identification signal of the data card 90, the vision inspection cell 12 images each data card 90 as it passes through the vision inspection cell 12, compares the images to the respective data record and passes the data card 90 to the packaging unit 16, the support fixture 30 has a sensor 74 that connects to the support fixture 30 for being able to detect when a data card 90 has been inserted therein, the sensor 74 connects via a transmission path to the CPU 26, the CPU 26, further includes an image memory buffer 38; a program sequence operating the CPU 26, stores in the image memory buffer 38, a copy of the image signal transmitted from the network job builder unit 18 for the respective card being manufactured, the CPU 26, generates a comparison signal by comparing the image data acquired from the data card 90 in the fixture 30 with the image data used to manufacture the data card 90 in the recording unit 14 to manufacture the data card 90, the comparison signal is transmitted via the transmission path to the network job builder 18 and stored in a status file that can be transmitted to the control image server 20 as a status report (see col. 19, line 35+ and elsewhere).

Claim Rejections - 35 USC § 103

Art Unit: 2876

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 11-13, 26, 27, 42, and 46 rejected under 35 U.S.C. 103(a) as being unpatentable over Provost. The teachings of Provost have been discussed above.

Provost discloses a magnetic card, but fails to disclose that void data is encoded in the magnetic strip and that the card is a chip card wherein the void data is stored in the chip memory.

The claimed chip card is functionally equivalent as the magnetic card disclosed by Provost. With respect to the location of encoding the “void” information, is just merely an engineering design choice for meeting specific customer requirements.

It would have been obvious for a person of ordinary skill in the art at the time the invention was made to modify the system of Provost to include a chip memory for storing card information. Such modification would provide greater storage space, which would allow storing of more personal information to make the system more secure. With respect to encoding the

“void” information onto the magnetic strip or in the chip memory, an artisan would be motivated to mask the “void” information in order to apprehend unauthorized attempting to commit fraud. Therefore, it would have been an obvious extension as taught by Provost.

8. Claims 4, 33, 34, 37 rejected under 35 U.S.C. 103(a) as being unpatentable over Slocum et al. The teachings of Slocum et al have been discussed above.

Slocum et al disclose voiding the card (encoding voiding information on the magnetic stripe, but fail to disclose printing a void mark on the card (i.e. on the magnetic stripe or on the face of the card).

Encoding “void” on the face of the card, is functionally equivalent as writing voiding (rejecting) information in the magnetic strip, failing to provide any unexpected results.

It would have been obvious for a person of ordinary skill in the art at the time the invention was made to modify the system of Slocum et al to encode a void marks onto the card for identifying rejected card. Such modification would effectively assist users in identifying rejected cards from active (non-rejected) cards, which would make the system more secure by discouraging unauthorized users from attempting to use rejected cards in the system. Therefore, it would have been an obvious extension as taught by Slocum et al.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McIntire et al, US Patent No. 5,410,136. Finkelstein et al, US Patent No. 6,176,430. Ohshima et al, US Patent No. 6,162,160. Smulson, US Patent No. 6,248,199. Nagel, US Pub 2005/0038756.

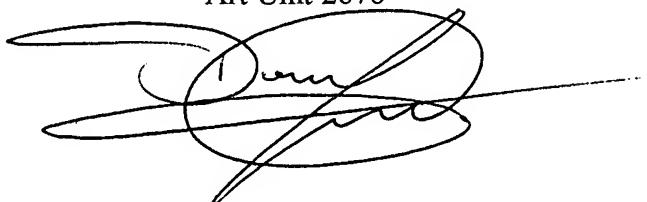

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel St.Cyr whose telephone number is 571-272-2407. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
